

ECHS SUMMER TECHNOLOGY CAMPS

AUGUST 7-11

Open to Gr. 7-12

Beginner Computer Programming in Python—\$150

We will spend the week covering the fundamentals of programming by using the Python Language. This will include discussion of variables, lists, conditionals, functions, and loops. We will conclude the week by creating the structure for a basic game and have the opportunity to break down and build a computer together.

This will run every weekday from 11A.M. to 1P.M.

ESports Program—\$60

We will spend the week playing different games (the primary being Rocket League) in addition to watching the Rocket League World Championship. We intend to have a Nintendo Switch available with games like Super Smash Bros Ultimate and Mario Kart. This will conclude with a fun, in-house tournament between all attendees.

If we desire, this can be extended to August 12 & 13 to watch the conclusion of the Rocket League World Championship. Equipment and Games will be provided by ECHS and the ESports Club. You are welcome to bring your own equipment.

This will run every weekday from 2P.M. to 4P.M.

Attendees are welcome to join us for both programs for the price of \$200. You are welcome to bring lunch. Pizza and Drinks will be provided on Friday at 1P.M. as a fun way to wrap up the week.

Payment can be made by cash or check of the first day of class. Checks can also be sent to East Catholic High School, Attn: Domenic Burby, 115 New State Road, Manchester, CT 06042.
